*Hurdle and Wire Fencing
Seeds*

'PHONE 580 JOHN

To Our Customers.

WE have the pleasure of presenting you our Seed and Implement Catalogue for 1912. If you have no use for it, we shall esteem it a favor if you will kindly hand it to some friend to whom it may be of service.

Our SEED DEPARTMENT is under our personal supervision. No pains or expense have been spared to secure the very best Seeds from reliable growers.

TERMS. &c.

The prices on all Machines and Tools found in this Catalogue are net; 5% will be allowed for spot cash with order. All orders from unknown parties should be accompanied by remittance, or reference to some responsible house in this city.

TO MAIL CORRESPONDENTS. *We pay the postage on Seeds in packets, ounce and quarter-pound papers to any part of the United States; On Seeds purchased in large quantities, add postage at the rate of eight cents per pound.*

Parties ordering Seeds by mail will please write their name and post-office address distinctly. Remit by Express Money Order, Draft, Post Office Order or Registered Letter.

All orders by mail will receive prompt attention. Correspondence cheerfully answered,

PRICES OF BAGS.

Quarter Bushel,	\$o 12	One Bushel,	\$o 17
Half Bushel,	15	Two Bushel (Seamless),	23

Bags used in packing Seeds will be credited at cost, if returned in good order within fifteen days from date of invoice. Return charges must be pre-paid.

WARRANTIES.

Irreproachable Seeds sometimes fail to germinate through many causes, one of the most common being heavy rains after sowing, and the consequent baking of the ground afterward. The germination of seeds underground is caused and maintained by the formation of gases in the seed, which, in truth, consumes the seed and nourish the sprouts until these are above ground, when the sun and air supplies the necessary nutriment, a process which fails in case: of too deep sowing, or the ground forming a hard crust on the top, the seed is consumed before its sprouts have reached the surface of the ground; besides, an untimely frost, or a very cold current of air passing over the shoots immediately on their appearance above ground, may destroy the whole process of vegetation; or want of moisture in the soil may prevent the seed from germinating at all. Then again, vermin, cutworms and other insects scarcely visible, may destroy a crop, unknown to the planter. And, finally, there are sometimes causes at work changing the habits and character of plants, which escape the closest observation, owing to conditions of temperature, and which are but little understood.

For the above reasons, we wish to state in this explicit form, that we give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

REVERSIBLE SULKY PLOW.

While under ordinary conditions the width of furrow is regulated by the clevis, with the Syracuse by means of our ratchet foot lever on pole, the operator can change the width of furrow at will, can plow around curves or obtain the full width of furrow in plowing sidehill land. This feature is found in no other plow.

We furnish bottoms in four sizes. They are what are commonly styled Combination Bottoms and have hardened soft centre steel moldboards, solid steel landsides, cast shares and shoes.

Right hand Left hand Furrow
Nos. 32 37 3 to 9 in. deep, 11 to 14 in. wide
" 31 39 4 to 10 " " 12 to 16 " "

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for cash with order.

SYRACUSE R GANG PLOW

To-day the farmer realizes he must depend more on horses and machinery and less on hired help if he is to do his farm work in season. There is no tool on the farm that will pay larger on the investment than a Good Gang Plow; and the only honest definition of a Good Gang Plow (with two bottoms) is one that will do more work, better work, and do it with less work on the part of horses and man than two similar hand plows. If you are offered a gang plow which does not live up to the above definition—don't buy it. We do not claim that the Syracuse is the only Gang to qualify, but we *do* claim that the Syracuse "R" Gang is positively a little better than *ANY* other.

Price of R Gang Plow with 12-inch Steel Bottoms, Jointer, Weed Hooks and Four-Horse Eveners\$72.00 net.

Price of the above rig with Chilled Bottoms in place of Steel.....\$70.00 net.

If Rolling Coulters are wanted in place of Jointers, add.....\$2.00

New Universal Combination Hill and Drill Seeder, Cultivator, Plow, Rake and Marker, No. 22

As Seeder

As Cultivator

A Seeder that will plant in hills varying from 4 to 48 inches apart, as well as in drills. Has high Arch of steel, allowing cultivation of plants 20 inches high. Used as *One* or *Two* wheel Cultivator at the will of operator. Has 1 pair 8-inch Hoes, 1 pair Narrow Cultivator Teeth, 1 pair Wide Cultivator Teeth, 1 only Center Cultivator Tooth, 1 pair Plows, 1 pair Rakes, 1 pair Vine Guards.

Price, complete, \$9.75 net.

New Universal No. 17 Garden Drill.

NO BETTER SEEDER CAN BE PRODUCED.

Especially recommended to users requiring a Perfect Drill Seeder. It has all the Special Seeding Features so well known in the New Universal line, such as perfect device for regulating the quantity of seed to be planted. (It will plant from a paper of seed to any desired quantity.) It also has the other Special Features of the New Improved Cut-off, as well as Improved Markers. Net, \$7.40.

New Universal Double Wheel Hoe, Cultivator, Rake and Plow, No. 14.

Net Price, \$5.25.

SPECIALLY DESIGNED FOR WORKING BOTH SIDES OF THE ROW AT ONE PASSING.

The special recommendation is the *Adjustable Arch*, by which not only the *depth* of work can be gauged, but which, by an ingenious device, enables the teeth to be pitched at any angle desired. The attachments are 1 pair Hoes, 4 Cultivator Teeth, 1 pair Plows, 1 pair Rakes, and 1 pair Vine Guards.

Universal Single Wheel Hoe, Cultivator, Rake and Plow, No. 12

Price, with all attachments net \$4.30.

No. 13 with one pair Hoe Blades only, net..... \$2.90

New Universal High Arch Expansion Wheel, Hoe, Cultivator, Rake and Plow, No. 26

Net Price, \$7.90.

SPECIAL FEATURES

Adjustable Steel Arch allows regulation of depth, and also the pitch of teeth and the height allows cultivation of plants 20 or more inches in height. Extension Pads or Tooth Holders allow

low expansion and contraction so any width of cultivation can be had from the narrowest up to 20 inches in width. Attachments furnished are: 1 pair Long Bladed Hoes, 1 pair Short Bladed Hoes, 1 pair Narrow Cultivators, 1 pair Wide Cultivators, 1 Centre Cultivator, 1 pair Plows, 1 pair Rakes, 1 pair Vine Guards, and 1 Centre Tooth Holder.

New Hand Plow, No. 10.

To be appreciated this little labor-saver must be seen in actual work; its cost is soon saved in a family vegetable garden, even if but twenty feet square. Price, net, \$1.80.

8 Foot Distributor, for 2 Horses..... 49.00

Single Row Fertilizer Distributor.

This machine has now been in successful use for fifteen years and stands without question as the *only Perfect Fertilizer Distributor* on the market. Its popularity

among the market gardeners near the great cities is unbounded, notably so in the neighborhood of New York and Brooklyn.

HAS POSITIVE FORCE FEED. Will sow dry or damp fertilizer from 150 to 2,800 pounds per acre, spreading it six inches wide in furrows.

THE HOPPER WILL HOLD NEARLY A BAG OF FERTILIZER.

Net Price.....\$14.00

KEMP'S TWENTIETH CENTURY MANURE SPREADER

The best spreader made; either broadcasts or drills stable manure, either fine or full of corn stalks, ashes, lime, phosphates, etc.; picks it fine and spreads evenly.

SECTIONAL ADJUSTABLE WEEDER.

7 ft. 3 in. Wide.

Made in three sections. Any number of teeth can be easily removed. This is a feature the farmer highly appreciates.

Net Price.\$11.00

Cahoon's Broadcast Seed Sower.

Will sow Wheat, Rye, Oats, Hemp, Barley, Timothy, Millet and Clover.

It throws same from eight to twenty feet on each side of the operator. At a common walking gait sows from four to eight acres per hour.

Price.....\$3.40 net.

WHEEL BARROW GRASS SEEDER

14 ft. Single Hopper.	net, \$7 50
14 ft. Double "	" 9 75

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for cash with order.

Reeves' Improved Potato Planter

Will plant whole or cut potatoes any depth, drops them in rows 15, 19, 23 and 30 inches apart. The potato is partially covered with earth when the fertilizer is dropped, therefore it does not come in contact with the seed; the discs cover both potatoes and fertilizer any depth desired.

This Planter will sow from 150 to 1,150 pounds of fertilizer per acre.

No. 8. One horse Planter with Fertilizer Attachment, net \$55.00.

No. 10. Two horse Planter with Fertilizer Attachment, net \$68.00.

No. 12. Two Row Planter with Fertilizer Attachment, net \$105.00.

Potato Hiller and Coverer.

Also successfully used in hilling Celery and Asparagus, etc. There are hundreds of them in use in the potato growing districts. Net price, \$10.00.

Disc Hoe and Coverer.

Handles and Discs are adjustable for covering and filling Rowed Crops as fast as the team can walk. Has two 16 inch. Steel Discs.

Net.....\$10.50

Whiffletrees and Neck Yoke, extra....\$3.00

The "Success," Jr. Potato Digger.

This Digger has made a splendid record in many trials with high-priced diggers. It has been adjudged the superior digger. It is light in draft, light to operate, but heavy in merit.

Net Price.....\$10.50

Gilt Edge Potato Harvester.

Ordinary draft for one team. Very easy to handle, in fact, if you are a little inclined to be lazy, do as one man in Colorado did, bolted his plow seat on and had a riding digger. Very simple in construction, very strong and durable, built to stand, not to wear out. Easily regulated for any depths. The 12 tine forks, 24 inches wide, kept in rapid motion, thoroughly separates the potatoes, little and big, from the soil, leaving them in just as good shape for picking as if dug by hand. Net, \$35.00.

O. K. Potato Harvester

This machine is built strictly of high grade material, mostly steel

and malleable iron. When in operation the soil passes over the shovel onto the elevator bottom and fork are agitated their entire length, so that the potatoes are separated from the ground and left in narrow rows convenient for picking up.

Weight packed ready for shipment is 730 lbs. Net, \$85.00.

Potato Sorter and Sprouter.

Two men and a boy can sort and put into the wagon from 80 to 100 bushels an hour. It can be operated by one person if necessary. As you see, the potatoes pass from the hopper into the cylinder, which should be turned very slow. Pick out the decayed or scabby potatoes as they pass through the hopper. If the potatoes need sprouting, raise the lower end of the machine or turn the cylinder half way over, and then back, or both. The small potatoes, dirt, straw, etc., will fall under the sorter into the basket, while the merchantable ones will be delivered into baskets as shown, or they may be run on an incline into the cellar. To sort seed potatoes from the small ones, just wind the cylinder with binder twine the proper mesh, and the result will surprise you. Net, \$17.00.

Each machine is furnished with 4 tubes, 6 nozzles, 2 straps and oil can; will dust two rows of potatoes at a time.

Weights about 6 lbs.

Price.....\$8.00.

Little Giant Dusters.

Will dust two rows at a time. Each machine furnished with two tubes, five nozzles and strap. Price, \$6.00.

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for cash with order.

The Modern Atlas is absolutely the strongest, most rigid and all-around best grindstone ever made. It is fitted with ball-bearings, which make it run easy. It has a comfortable seat which is adjustable to any length leg.

The power is applied on the correct mechanical principle, the operator using both legs obtains almost double the power obtained with a hand crank, besides running at a much higher speed, and having both hands free can perform faster and better work. Stones are clean, carefully selected Berea grit, 20 to 22 inches in diameter; 2 to 2½ inches thick.

Weight, about 60 pounds.
Price....\$6 00 net.

Family Cider Mills and Wine Presses.

The No. 1 Mill can easily grind from eight to ten bushels of apples, and from ten to twelve bushels of grapes, currants, etc., per hour. The curb (or press) will contain the pomace of one and a half bushels of apples. One man can make with it from two to three barrels of cider, or from 100 to 150 gallons of wine per day. Weight, 150 pounds.

The grinder of No. 0 is same size as No. 1, but the curb is smaller.

No. 5 GRINDING MILL.

FOR HAND AND POWER.

With Double Reduction Grinding Cones.

No. 5 Mill.

No. 5 cut shows hand and power mill with a spindle containing sawcob-crusher and the two grinding rings by its side.

No. 5 cut shows hand and power mill with a spindle containing per pair, \$1.50.

Pulley, 20 x 3. Speed, 50 to 400. 1 to 2 horse power. 1 to 10 bushels per hour. Weight, 100 pounds.

This hand mill has our Saw Crusher, double reduction dress on face of Grinding Cones, ball box bearing end of Spindle. It has a pulley fly-wheel with handle.

If it feeds too fast for power employed reduce the speed of mill until it will drive at proper speed. It is well adapted for light wind powers.

Will grind corn and cobs one ear at a time to fine feed meal, also all shelled grain, bones (after they have been boiled twenty-four hours—not green bones), oyster shells, crackers, dried bread, spices, coffee, etc.

MODEL GRINDING MILL

An Improved Hand Power Grinding Mill of new and elegant design.

They are intended to grind all kinds of grain, dry bone, shells, roots, bark, salt, etc.

They are the best all round Family Mill, producing cracked wheat, graham flour and corn meal for the family at the slightest cost, producing cracked or ground corn or other grain of any fineness necessary for feeding to the young chicks and the coarse for the grown fowls; all so easily controlled and adjusted, leaving nothing to be desired.

They are easily adjusted to grind fine or coarse without the use of wrench or other tools. The Burrs are made of Steel-Alloy Metal, the most durable grinding surfaces made.

Their capacity is about as follows, depending on the condition of the grain or fineness of the meal:

No. 1 1/2, 1/2 to 1 bushel per hour.....	Net, \$3.00
No. 2, 3/4 to 2 1/2 bushels per hour.....	5.50
No. 3, 1 to 3 bushels per hour.....	7.50
No. 4, with Fast and Loose Pulley for Power only....	13.50

Requires 1 to 2 horse power. Speed, 400 to 800 revolutions. Capacity, 5 to 8 bushels per hour.

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for each cash order.

THE TRIUMPH HAY PRESS.

The Triumph Press is designed for the individual farmer, or for one or two farmers together, and not as a "business" press. It can be operated in limited space—on the barn floor often.

The Triumph can be used by two men, with either one or two horses; a straight pull of nine feet compresses a charge, and springs return the plunger to its original position, bringing back the whiffletree, keeping the traces tight and guiding the team in backing.

NET PRICES

14x18 Chamber, \$100.00; weight, 650 lbs. 17x21 Chamber, \$110; weight, 700 lbs.

The daily capacity of the Triumph ranges from four to eight tons of hay a day of ten hours. The amount will depend, of course, on the workmen and other conditions. The press is capable of putting up even more than this, but we would prefer to make conservative estimates rather than those that might seem to be overdrawn.

The Triumph is made in two sizes.

The small size chamber will make bales weighing from sixty to one hundred pounds; the large size will make them as heavy as 125 pounds.

Columbia Belt Power Press

Hold the World's Record for FAST BALING AND LOW REPAIR BILLS. Requires from eight to ten horse power. Size 17 by 22 has baled 50 tons of hay in 10 hrs. Size 14 x 18 has baled 38 tons in one day. The 17 by 22 will make a bale of hay weighing from 80 to 175 pounds, and 14 x 18 a bale from 75 to 140 pounds, according to the amount of tension on bale chamber and quality of hay.

Reeves' Hand Baling Press.

PRESS CLOSED.

Makes a vertical bale, 17 x 21 inches x 2½ feet long. The lever which operates the plunger is 8 feet long, and through the compounding principle, 100 pounds on the end of a lever gives several tons pressure on the plunger. The material to be baled is placed in the press when the plunger is up, the plunger is then released, and falls upon the loose material, and is compressed by the use of the lever. By repeating this operation a solid, compact bale is

made, and is held together by two or three ten-foot baling ties.

It will make a bale of Hay weighing from

80 to 100 pounds.

It will make a bale of Hair weighing from

100 to 250 pounds.

It will make a bale of Moss weighing from

150 to 175 pounds.

It will make a bale of Wool weighing from

225 to 270 pounds.

It will make a bale of Rags weighing from

225 to 275 pounds.

Price, \$65.00, net.

PRESS OPEN.

Eagle Double-Lever Hand Cotton and Hay Press.

FOR COTTON.

No. 1, 5 ft. depth of box, makes a bale 36 to 50 in. long by 18 to 24 in. wide, as wanted. Will hold 300 lbs. \$170.00

No. 2, 6 ft. depth of box, makes a bale 60x24 ins. Will hold 400 lbs., \$225.00

No. 3, 7 ft. depth of box, makes a bale 60x27 ins. Will hold 500 lbs., \$250.00

FOR HAY AND STRAW.

No. 1, 5 ft. depth of box, makes a bale 46x25 ins., 175 to 200 lbs. \$100.00

No. 2, 6 ft. depth of box, makes a bale 50x27 ins., 275 to 300 lbs. \$150.00

Eagle Steam Power Baling Press.

For Baling Cotton, Hemp, Paper, Rags, Waste, etc.

No. 1, 6 ft. depth of box, makes a bale 48x25 ins., 500 to 700 lbs. \$300.00

No. 2, 7 ft. depth of box, makes a bale 54x27 ins., 700 to 1000 lbs. \$350.00

Minnich's Pattern Baling Press.

PRESS CLOSED.

For all products requiring baling. Will turn out more bales, with less labor, in a given time, than any other press made. Entirely new in principle. Ends open out with sides, leaving bale clear all round, giving no labor to get it out. For products requiring baling, the burlaps can be extended over the ends, and whilst under pressure the ends can be tucked in, and with a few stitches in the centre the heads are finished, saving time and twine, and giving the bale a much finer appearance. Can

be used in rooms with low ceiling; convenient for filling on same floor. Presses built to order for any sized bale of any product desired. Regular sizes according to products.

Box 4 feet long, 24 inches wide, 4½ feet deep.

Box 4½ feet long, 27 inches wide, 4½ feet deep.

Will make bales of about the following weight: Rags, 500 lbs.; Cotton, 400 lbs.; Wool, 500 lbs.; Moss, 250 lbs.; Hair, 450 to 500 lbs.; Hay, 175 lbs.

We can also furnish these presses without PRESS BOX or with DOUBLE LEVERS, or a press to make a 100 pound vertical bale. Prices for special presses furnished on application

**THE
CALDRON
DUMPS.**

The Profit Farm Boiler, a simple Furnace with a Caldron which dumps. The contents can be emptied in one minute, doing away with dipping it out. It is thoroughly constructed of the best cast-iron. When Kettle is dumped, all the Flues are exposed.

DIRECTIONS FOR COOKING FOOD FOR STOCK.

Fill the Kettle before lighting fire, and put in plenty of water to prevent the feed from burning on bottom of Kettle. Always see that the Dampers are open and the ashes are clear from the Grate. Keep the bottom of the Kettle clean, and the Flues free from soot. In emptying Kettle you need not let fire go down; simply dump Kettle and have water ready to throw in at once.

**REEVES' STEAM FEED COOKER
AND STEAM GENERATOR.**

Burns coal, wood or cobs. Every farmer needs one.

This steamer is small and compact, requires but little room, cooks by steam all kinds of grain, vegetables, corn on the ear, hay, straw, and corn stalks, heats water for any purpose, cheesevats, scalding hogs, laundries, etc. Cleanses quickly and perfectly milk cans, pails, tubs and barrels, and banishes the old arch-kettle, with slow work and the waste

of fuel; can be run and cared for easily, and will generate more steam with the same amount of fuel than any other in use. It is simple, strong, safe, durable, economical, cheap, and will do all that is claimed for it. It is made from boiler iron and has regular lap-welded boiler flues, making it durable, rigid and strong in all parts and will last, with ordinary care, a lifetime. They are well riveted and caulked and are capable of standing a hydraulic pressure of 150 lbs. to the square inch, and are perfectly safe carrying 100 lbs. pressure.

Size No. 2, diameter of shell, 19 in.; height of shell, 44 in.; number of 2-in. flues, 13; length of boiler over all, 58 in.; shipping weight, 370 lbs.
Price.....\$40.00.

SANITARY TUBULAR STEEL STALLS AND STANCHIONS.

Note how neat and symmetrical and clean looking it appears with nothing to interfere with light and ventilation.

The regular section consists of one partition, one upright post, 3 to 3½ feet top of rail, as specified, two T couplings and one Tubular Stanchion with regular top and bottom fastenings. The end section consists of one partition, one post, one T coupling and one corner coupling.

When the stall joins another section or is attached to a wall, the end section is not needed. For concrete floors, the lower ends of partition and post are made five inches longer and are flared to hold the concrete. Floor plates are furnished for wood floor.

Price of Stall and Stanchion as above described for concrete floor, net \$8.00 each; for wood floor, \$8.40 each. Price of Tubular Steel Stanchion only, \$1.60 each.

Cut Shows How Rope and Pulleys Are Adjusted.

The above cut shows hay being taken in where driveway is in center of barn and hay mow on either side. When asking for estimates on outfits kindly state size of barn, distance rafters are apart, and whether delivery is to be made in center or at one end, or outside of barn. Our line of Haying tools is complete and we would like to name you price on your entire outfit.

New Model Double Trolley Litter Carrier

CAR—Consists of double swivel trolleys at each end, and is held together by a 1½-inch angle iron beam which forms another swivel, making three swivels at each end of the car, allowing the double trolleys their freedom to follow any curve desired.

PAN—Is made of heavy galvanized iron flaring at all four sides, water-tight; supported at each end by a bracket which supports bottom of pan and forms an axle at each end, which is also braced to the top of the pan, which strengthens it. The pan is held in place by means of a weighted latch which holds it in position for loading, and does not allow it to dump until tripped, thus giving it free revolution.

GEARS—Used to raise and lower the pan; contains one large cog wheel and a small one, to which the crank is attached. This crank turns the wheel attached to the winding shaft on which the chain is wound in the center. The chain runs over swivel pulley and then down to the main stock, giving a raising leverage of great power, excelling all other carriers on the market. The pan is raised to the car, after which the pall is released from the ratchet; at the same time puts on large gear wheel and lets the pan down to the floor slowly, or stops it. Capacity, 700 to 1,000 pounds. Size of pan, 32 in. wide, 45 in. long, 12 in. deep.

Hay Caps.

Chemically treated to prevent mildew. For protecting Hay from rains after it is cured and before it can be stored in the barn. Order early to insure delivery.

Size, 5 feet by 5 feet.
Net, \$1.00 each.

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for cash with order.

FINISHED ROUND SILOS.

COMPLETE, READY FOR SETTING UP AND FILLING.

DOES A SILO PAY?

The day has forever gone by when men are asking, "Will a Silo pay?" All acknowledge that a Silo does pay. The only point is, some men believe it more firmly than others and put their belief into action, and buy or build a silo. The man to-day who is dairying without a silo is no more in competition with an up-to-date dairyman than is a one-legged man in competition in a race with a two-legged man. Let us look at this from a practical standpoint. The great trouble with us to-day as farmers is, we are mowing too many acres to fill our barns; we are tilling too many acres to enable us to keep our stock. It costs too much, both in money and labor. Let us see if this cannot be overcome. An acre of ground, on the average, will yield $1\frac{1}{2}$ tons of hay or

15 tons of ensilage. According to Wisconsin Experiment Station analyses a ton and a half of Timothy hay and fifteen tons of ensilage will give the following:

		Digestible Nutrients.		
Timothy hay 1 acre	Dry matter 2604 lbs.	Protein 84 lbs.	Carbohydrates 1302 lbs.	Ether extract 42 lbs.
Corn ensilage 1 acre	7920 lbs.	390 lbs.	12120 lbs.	210 lbs.

Let us know how many cows you wish to provide for and we will be more than pleased to quote you on not only a suitable size Silo, but also on Ensilage Cutter, Carrier and Power to run same. We however believe a personal interview would be far more satisfactory, and if you can not find it convenient to stop in and see us we will be glad to have our representative call upon you, provided you are not too far away.

SPECIAL SILO CATALOGUE SENT FREE UPON APPLICATION.

ENSILAGE FORK.

This Fork is made especially for handling Ensilage. Has 8 tines, D handle and strapped ferrule. Made of best Crucible Steel. Net Price, \$1.75.

WAGON ENSILAGE HARVESTER.

WITH EITHER WOOD OR STEEL WHEELS.

The most effective harvester ever used in the Corn field for cutting and hauling to the silo or for cutting and shocking in the field. By detaching the platform it is converted into a complete Handy Farm Wagon. Two men with a boy to drive will catch and load from one to two tons in from eight to fifteen minutes, depending upon the weight and thickness of the crop. With this machine *Silo Filling* is made easy, as the greater part of heavy labor is eliminated and working force very much reduced. Size of Platform, 7 ft. wide, 12 ft. long; 5 ft. between standards; rear stakes, 4 ft. high.

Net Price, \$100.00.

The prices on all machines and tools in this catalogue are net; 5 per cent. will be allowed for cash with order.

PHARMACY CUTTER.

For Cutting and Screening to any Desired Size.
Roots, Herbs, Leaves, Barks, Spices, &c.

The Machine has four 16-inch knives. The material cut off is carried over a perforated plate, and what is fine enough falls through the perforations, the balance is returned to the front and recut until sufficiently fine. The cut stock is collected in a box under the plate. The knives are straight and thus easy to sharpen, and are placed at an angle against the bed-plate of the cutter, which forms a cutting edge against which the knives work, thus having a perfect shearing action on the material.

The perforated plates are easy removable and the holes in them being made of any desired size, the change from one grade of fineness to another can be made in a moment, by simply changing the plates. The fineness depends only on the size of the holes in the plates and it is just as easy to make the material $\frac{1}{8}$ inch long as to make it $\frac{1}{2}$ inch.

Each machine is furnished with two plates of any desired bore, and extra plates are made to order on short notice.

The power to run one of these cutters is only one horse or less, depending on the nature of the material operated upon.

Price..... \$75 00

for hand or power 20 00

Reeves' Rapid Vegetable Cutter

Has three cutting knives on the fly wheel, follow closely after small projecting, slicing or slitting knives, which cut at right angles to the edge of the cutting knives, thus reducing the material to a very nice condition for feeding.

The hopper bottom is of slanting cast grating, which allows dirt, gravel or foreign matter to fall through and thus be kept separate from the cut feed.

Net price for Hand Cutter..... \$14.00

Reeves' Portable All-Steel Adjustable Fencing

For Parks, Cemeteries, Gentlemen's Estates,
City Plots and General Purposes.

Is adjustable to Hilly or Level Ground. Lateral Bars are always parallel and Posts perpendicular; requires no digging of Post Holes; Sections are driven in the ground alongside of one another and bolted together. Each Section is 8 feet long and makes a 4-foot Fence when set.

The Posts are made of $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ -inch Angle Steel and the Lateral Bars are $1\frac{1}{4} \times 1\frac{1}{4} \times \frac{1}{8}$ Angle Steel. The Center Slat of $1\frac{1}{4} \times \frac{1}{8}$ Flat Steel.

The space between Bars is as follows: On Six-Bar Sections, $6\frac{7}{8}$ inches; on Five-Bar Sections, $9\frac{1}{4}$ inches; on Four-Bar Sections, 12 inches.

The Posts go in the ground 19 inches.

REEVES PORTABLE HURDLE FENCING

For Horses, Cows, Sheep, Pigs and General Use.

It is not only artistic, but serviceable and will outwear several woven wire fences, and is easily set, requiring no digging of post holes.

For inclosing and dividing lots or plots to suit any requirements on a gentleman's country seat or for farmers' use in general. No cheaper or more substantial fence can be made at the price; it is made of young chestnut timber.

Is constructed in sections, each section, or Hurdle, being 8 feet 3 inches long, having posts 6 feet long and making a fence 4 feet high when set.

We make them in three styles, four, five and six bar, all of which are of the same length and height, the difference being in the spacing of the bars.

They are easily put up. Two men can place from two to three hundred hurdles per day. They are set by making a hole in the ground with a crow bar and driving in the end posts.

The hurdles are locked together by wooden pegs, which are furnished with them. They are easily taken down and transferred from one plot to another, and during the winter months can be compactly stored.

ELECTRICALLY-WELDED WIRE FENCE.

It is made from thoroughly galvanized steel wire that is specially adapted to this use, all horizontal and vertical strands being firmly welded at their intersections, and every joint is guaranteed to be equally as strong as the wire. Mutual support is thus given to all wires, and any load or pressure which may be applied to the fence will be distributed over a number of its strands, thereby preventing excessive strain on any portion of it.

Having no sharp angles or projections, it cannot injure cattle or tear wool from sheep.

It can be easily erected on uneven or hilly ground, and when properly stapled to posts will not sag.

If desired, the fence can be taken down, rolled into a compact bale and erected in another place without displacing any of its wires.

We can furnish a large variety of meshes from wire of various sizes, also many styles composed of short and narrow meshes at the bottom and long and wide ones at the top, thus enabling purchasers to select a fence which will afford the desired protection at the least possible cost.

The accompanying cuts show a few of our standard styles, and if others are desired, we shall be pleased to quote on any specifications that may be submitted.

The top and bottom strands of Standard style are No. 9 and the intermediate No. 11 gauge wire.

Water Elevator and Purifier.

For Wells and Cisterns.

WHY WE SELL IT.

What the lungs are to the human body, the Water Elevator and Purifier is to any body of water over which it is placed. By forcing air into contact with the blood, the lungs eliminate the poison which is being constantly generated in that fluid. By forcing air into the stagnant depths of well or cistern the Elevator performs the same wholesome service, correcting the foul conditions, and carrying destruction to the nimble and deadly Microbes, and their more pretentious, but milder brethren, the Wiggle-tails.

REEVES' TRIUMPH SOD CUTTER.

FOR ONE HORSE.

It is the best and cleanest sod-cutting machine in America. Has a *Reversible Knife* made of one piece of steel. While one side dulls, the opposite edge is getting sharpened, cannot get choked. An Adjustable Roller regulates the thickness of the sod from one-half inch to 2 inches in thickness; the front roller swings back under the guide-shoe and takes the weight when the machine is not cutting. The guide-shoe can be changed to either side in a minute; no friction or injury to the grass. The knife can be cleaned without turning over the machine. This new implement cuts the sod of uniform width and thickness, in any length, so that it is particularly adapted to giving solidity to slopes in cuts and on embankments, working equally well on level or uneven surface, cutting both ways with the land, and leaving no sod uncut, being light of draft, easily managed, strong, neat and durable. One machine will cut from 30,000 to 40,000 square feet per day, thus doing the work of forty men. We guarantee the expense saved between cutting by hand and with horse power in one day to pay the price of our machine.

Instructions for operating furnished with every machine. Every cutter warranted.

PEERLESS CREAMERY.

The Peerless Creamery is more especially intended for water alone. The cans are oblong, 14 inches long, 5 inches wide and 14 inches deep, thus giving large cooling surface. We have a large ice space in rear of, and also between the cans; in the No. 4 we have the space between the two middle cans, 7 inches; also, in all the other sizes we have a large space between second and third, fourth and fifth, and sixth and seventh. In these, as in the round can creamers, we use a straight faucet underneath, which is easily cleaned. The glass to observe the cream is in the nut and not in the can, so is easily repaired if accidentally broken.

In the No. 3 and larger-sized creameries, the faucet for drawing water from the tank is placed outside of creamery, as shown in illustration. Where ice is not used, we would suggest emptying tank of water about a half-hour after milk has been placed in cans, and refilling tank with cold water. This will save a few hours' time in the gathering of cream.

De Laval Cream Separators, Hand Sizes.

The purpose of the cream Separator is the quick and complete separation of cream from milk in the simplest and most profitable manner possible.

If used for the production of cream for any commercial purpose, no other system can be considered in comparison with the separator. Its product is the sweetest, freshest, most uniform, freest from taints, may be easily run of any desired consistency—from the lightest to the heaviest—and is superior in every respect. In all the larger cities, and in many smaller places as well, the best trade can now be satisfied with nothing but "separator" cream, and the price commanded is proportionately greater.

est—and is superior in every respect. In all the larger cities, and in many smaller places as well, the best trade can now be satisfied with nothing but "separator" cream, and the price commanded is proportionately greater.

STAR MILK COOLER.

How It Works.—The water for cooling enters the machine through lower tube and fills the entire space between the sheets (see marked "Water") and discharges through top tube. As the water keeps constantly changing a complete circulation of the water is enforced. The warm milk runs from Milk Tank into top feed trough and through feed holes to outside of both cooling sheets and is cold

holes to outside of both cooling sheets and is cold

when it gets to the bottom, because, while the milk is running down outside the water is moving up inside.

If water is 54 degrees, milk will run off Cooler at 56 degrees. Milk is cooled to within two degrees of temperature of water.

The Stoddard Churn.

Awarded First Premium after thorough test at the largest exhibition of Dairy Apparatus ever made in this country, at Philadelphia, Sept. 6-25, 1880.

Is easily operated, easily cleaned, is made of white oak in the most thorough manner. It will last for years. The principle is *concussion*, and not friction; has no floats or paddles inside. It is especially adapted to the *granular system* of

making butter. The grain of the butter is perfectly preserved, which adds to its keeping qualities.

IXL Self-Gauging Butter Printer.

It is designed not only to print the butter, which it does very neatly and quickly, but also weighs or gauges it into pounds or ½-pounds, as desired, in one-quarter the time it can be done by hand. In these days of imitation and adulteration, we would advise every one making butter to have their monogram or initials cut on the butter print. This would prevent imitation. To a person making a uniform good article this would be of incalculable value.

Patent Butter Workers.

It is a machine that is very efficient in its work, simple in its construction, and convenient to handle. It will work a batch of butter in from three to five minutes, according to the condition of the butter, working out the butter-milk and thoroughly mixing in the salt, doing the work far quicker and better than it can be done by hand. It consists of a tray and a roller with paddles, which is turned by a crank, and traverses from end to end of tray. It acts on the butter on precisely the same principle as a ladle in the hands of a person, but with perfect uniformity.

It cuts fast and is easy running. Leaves the feed in fine ribbon-like strips that make choking impossible. Fowls large or small can safely eat the feed.

Net price.....\$5.00

The "Keystone" Fire Extinguisher.

Powerful, effective, simple, reliable.

Is the latest and most improved fire extinguisher on the market.

It is made of heavy cold rolled copper, highly polished and handsomely finished. The inside is thoroughly coated to prevent any corrosion. The seam is hand riveted—a much stronger construction than the so-called lapped or locked joints.

The cage which holds the acid bottle rests securely on a rim within the collar and can be instantly removed by the fingers.

The acid bottle is simply placed within the cage and when the cap is screwed on the extinguisher both bottle and stopple are held in proper adjustment by a small strong cage securely attached to the cap.

Is instantaneous in action, has perfect regulation of acid feed and when turned bottom up it throws a stream forty-five to fifty feet and stops playing when turned back. *It is entirely free from stop cocks, valves, tubes, hinges, springs and catches.*

Is tested to 350 pounds to the square inch by hydrostatic pressure.

Net price.....\$12.00

A detailed black and white illustration of a step ladder. The ladder is shown in its open, A-frame position. It has two main side rails connected by several horizontal rungs. The top of the ladder has a small platform or step. The base of the ladder is designed with curved feet to provide stability when opened. The drawing is done in a classic, engraved style with fine lines and cross-hatching for shading.

WINDMILLS

FOR PUMPING AND POWER.

Windmill Pump Jack.

Is necessary to operate a pump with a power windmill.

With 10 x 4 pulley.....net, \$10.00
 " 12 x 5 " " 15.00

Windmill Foot Gear for Power Mills.

With pulley 18 x 5.....net, \$10.00
 " 24 x 5.....net, 15.00
 For 16 ft. power mill.

In both pumping and power mills of our make the main shaft is supported by a *bearing on each side of the turntable*, properly balancing the entire machine and preventing overhang of the wheel. Materials used are such as are best adapted to their requirements and are heavy enough to withstand all strains to which they are subjected.

Finest Mixed Lawn Grass Seed.

REEVES' FINEST MIXED LAWN GRASS SEED produces lawns of great beauty and permanence, in as short a time as it is possible for them to be made.

This lawn mixture has brought us thousands of customers and is the result of over a half a century's experience in the seed line.

In making comparison with other lawn mixtures, kindly compare weight and quantity required per acre.

Price per bushel of twenty pounds, \$5.75; $\frac{1}{4}$ bu., \$1.75.

Three bushels required per acre.

Reeves' Central Park Lawn Mixture.

A very good mixture, 16 pounds to the bushel, at \$4.00 bu. Four bushels required per acre.

Reeves' Lawn Mixture for Shady Places.

Per peck, \$2.00. Per bushel, \$6.75.

Reeves' Golf Mixture for General Grounds

Twenty pounds to the bushel. \$4.00 bu.

Reeves' Putting Green Mixture.

Twenty pounds to the bushel. \$6.75 bu.

Grass Mixtures for Railroad Banks, Etc.

Twenty pounds to the bushel. \$4.50 bu.

Purpose.

PERMANENT MEADOW MIXTURES.

For good land not too dry and not too wet. Two bushels per acre, at \$3.90 bu. of twenty pounds.

For dry and high land. Two bushels per acre. \$4.40 bu. of twenty pounds.

On wet late land. Two bushels per acre. \$3.90 bu. of twenty pounds.

PERMANENT PASTURE MIXTURE.

On good ground, not too wet and not too dry. Two bushels per acre. \$4.40 bu. of twenty pounds.

On dry land. Two bushels per acre. \$4.90 bu. of twenty pounds.

On wet land. Two bushels per acre. \$4.40 bu. of twenty pounds.

SHEEP FESCUE

TIMOTHY

ENGLISH RYE GRASS

Leading Varieties of Grass Seeds.

OTHERS FURNISHED IF DESIRED.

- RHODE ISLAND BENT GRASS** (*Agrostis Canina*). A valuable grass for lawns. For lawns, sow three bushels to the acre; for pastures one to one and a half bushels. See "Formation of Lawns." Per qt., 25 cents; per bush. of 14 lbs., \$5.50.
- RED TOP GRASS** (*Agrostis Vulgaris*). A valuable native, permanent grass as a mixture in either meadows, pastures or lawns, growing in almost any soil, moist or dry, and standing well our hot climate. (14 lbs. to bush.) Per bush., \$2.25.
- FANCY HEAVY, RED TOP GRASS**, absolutely clean seed. Per lb., 30 cents.
- SWEET VERNAL GRASS** (*Anthoxanthum Odoratum Puellii*). With pasture grasses it is valuable on account of its vernal growth, and also continuing to throw up root foliage until late in the autumn; for meadows, its chief merits are its fragrant odor, which the leaves emit when partially dried, thus sweetening hay; it is a vegetable condiment rather than a grass, of much nutritive value. Per lb., 26 cents.
- TRUE PERENNIAL SWEET VERNAL GRASS**. Per lb., 90 cents.
- ORCHARD GRASS** (*Dactylis Glomerata*). Is less exhausting to the soil than Timothy, and will endure considerable shade; it blossoms about the same time as Red Clover, making it on that account a desirable mixture with that plant; it is exceedingly palatable to stock of all kinds, and its powers of enduring the cropping of cattle commend it as one of the very best pasture grasses. (14 lbs. to bush.) Per bush., \$4.25.
- CANADA BLUE GRASS** (*Poa Compressa*). For poor soils. 14 pounds to the bushel, at \$4.20.
- SHEEP FESCUE** (*Festuca Ovina*). Short and compact growth. Valuable for lawns and sheep. 12 pounds to the bushel, \$3.75.
- MEADOW FESCUE, OR ENGLISH BLUE GRASS** (*Festuca Pratensis*). A highly valuable species for permanent grass land. It does not, however, attain to its full productive power till the second or third year, when it far exceeds most other sorts in quantity of its produce and nutritive matter. It is relished by live stock, both in hay and pasture, and is one of the most desirable permanent grasses for general culture. (22 lbs. to bush.) Per bush., \$9.00.
- ITALIAN RYE GRASS** (*Lolium Italicum*), is one of the most valuable grasses in Europe, being equally suited to all the climates. In England it is considered the best known grass to cut green for soiling, affording repeated large and nutritive crops; we recommend it here for use in pasture mixtures. (18 lbs. to bush.) Per bush., \$1.80.
- ENGLISH RYE GRASS** (*Lolium Perenne*), is the staple grass of Great Britain; entering largely into the composition of many of the richest meadows and pastures; its natural adaptation to almost all cultivated soils, and its early maturity, is the reason it has hitherto been so extensively cultivated in preference to many other equally nutritious sorts. (24 lbs. to bush.) Per bush., \$2.25.
- TIMOTHY** (*Phleum Pratense*). A grass so well known needs no description, except that for a hay crop on moist, peaty or clay soils, it will produce a larger crop than any other sort; it is not so well suited for light, sandy soils. (45 lbs. to bush.) Price variable.
- KENTUCKY BLUE GRASS** (*Poa Pratensis*), fancy triple clean—also known as GREEN GRASS, JUNE GRASS, etc., thrives on a variety of soils, but does best in dry and somewhat shady locations. It requires several years to become well established in the ground as a pasture grass. Very valuable for our Southern States, as it will stand the hottest summers. (14 lbs. to bush.) Per bush., \$5.75.
- WOOD MEADOW GRASS** (*Poa Nemoralis*), grows well under trees. 14 pounds to the bushel, at \$10.00.

MILLETS.

PEARL MILLET (*Pencillaria Spicata*). This splendid forage plant is becoming yearly more popular as its value becomes more widely known. It is a tender annual, and must not be planted until the weather has become *settled warm*. Wherever corn flourishes, it will yield bountiful crops of fodder, which cows, horses and other farm stock are exceedingly fond of. It is equal in nutritive value to corn fodder, while its yield is many times greater. Sow at the time of sowing corn (and not earlier), in drills three to four feet apart, and when well up, the plants should be trimmed out to one foot apart in the rows. Sown in this way, five or six pounds of the seed will plant an acre. Price, per lb., 18 cents. \$12.00 hundred.

HUNGARIAN GRASS (*Setaria Germanica*). A splendid forage crop for light land. On rich land two crops may be grown the same season. Withstands drought and yields abundantly; height, 2 to 3 feet. (48 lbs. to bush.) Per bush., \$2.40.

GOLDEN, OR GERMAN MILLET. A heavier cropper than the Hungarian, and needs a longer season and a stiffer soil; stands up well, is easily cured, makes a coarse, harsh hay which is greedily eaten by all kinds of stock. Per bush., \$2.40.

MISCELLANEOUS.

Velvet Bean, \$4.50 bush.	Sorghum, Amber Sugar Cane,
Soja Beans, \$4.00 bush.	15c. lb.; \$7.50 hundred.
Cotton, Upland, 12c. lb.; \$11.00 hundred.	White Kaffir Corn, 15c. lb.; \$8.00 hundred.
Cotton, Sea Island, 15c. lb.; \$13.00 hundred.	Sun Flower, Large Russian, 10c. lb.
Cow Peas, Black Eye, \$4.00 bu.	Vetches, Spring and Winter, 11c. lb.; \$11.00 hundred pounds.
Cow Peas, Whippoorwill, \$4.00 bu.	
Canada Field Peas, \$2.75 bush.	

GRAFTING WAX.

Per ½ pound.....15 cents | Per pound25 cents

Insecticides and Remedies for Diseased Plants.

ARSENATE OF LEAD.

Is more sticky in character than any other insecticide; for this reason is sometimes used where it is desirable that the poison should remain longer on the foliage. It is particularly good for extremely delicate foliage, as it will not burn. Used in proportion of two to three pounds of lead to fifty gallons of water, or two to four pounds of lead to one hundred gallons of water. For Coddling Moth, Bud Moth, Canker Worm, Rose Bugs, Cherry Bugs, Tossock Moth, Elm Leaf Beetle, Curculio and small chewing insects in general.

Price per pound, 20c.; 5 pounds, 95c.; 10 pounds, \$1.80; 25 pounds, \$4.00; 100 pounds, \$14.00.

BUG DEATH.

Non-poisonous, for Cabbage and Tomato Worms, Potato and Cucumber Bugs.

Per pound, 15c.; 3 pounds, 35c.; 5 pounds, 50c.; 12½ pounds, \$1.00; 100 pounds, \$7.50.

BORDEAUX MIXTURE.

Prevents blight, rot, mildew, specks and spots; increases crop yield 15 to 25 per cent. Fruits and Vegetables sprayed with it sell for much higher prices. Use by adding forty-nine gallons of water to one gallon of mixture.

Price per quart, 40c.; per gallon, \$1.00; 5 gallons, \$4.50. Fungous Diseases.

DRY BORDEAUX MIXTURE.

Liquid can be made from same in about ten minutes by adding 50 gallons of water to 10 pounds of Mixture.

One pound box, per pound, 20c.; 5 pound box, per pound, 20c.; 50 pound keg, per pound, 18c.; 100 pound keg, per pound, 17c.

FIR TREE OIL.

For Thrip, Red Spider, Ants, Brown and White Scale, Wood Lice, Grub Worms. For Greenhouse and House Plants. One-half pint to ten gallons of water.

Price, ½ pint, 40c.; pint, 75c.; quart, \$1.25; gallon, \$4.00.

HELLEBORE—Powdered.

Destroys Currant Worms, Rose Bugs, Cut Worms, Cabbage Worms, Slugs, etc. May be applied dry or mixed. One ounce to three gallons of water.

Per pound, 20c.; 5 pounds, 90c.; 10 pounds, \$1.75; 25 pounds and over, 16c. per pound.

KEROSENE EMULSION.

For Lice on Trees and Plants, Melon Louse, Pea Louse, Squash Bug, Elm Tree Beetle, San José and other Scales. Dilute 25 to 50 parts.

Per quart, 40c.; gallon, \$1.00; 5 gallons, \$4.50.

LIME, SULPHUR AND SALT MIXTURE.

For San José Scale, better than Whale Oil Soap, Kerosene Emulsion or Crude Oil. One gallon makes from 20 to 40 gallons of Spraying Solution by adding water.

Per quart, 40c.; gallon, \$1.25; 5 gallons, \$4.50; barrel of 50 gallons at 65c. per gallon.

PARIS GREEN.

For all Chewing Insects, Potato Bug, Elm Tree Beetle, Coddling Moth, Caterpillars, Cotton Worms, etc., etc.

Per ½ pound, 25c.; pound, 40c.; 5 pounds, \$1.85; 25 pounds, \$8.50.

SLUG SHOT—Powdered.

Non poisonous. For Potato Bugs, Beetles, Green and Black Flies, Slug Worms, Caterpillars, etc. 5 pound package, 30c.; 10 pounds, 50c.; 125-pound keg, \$5.00; 235-pound keg, \$9.00.

SCALECIDE.

For San José Scale, one gallon to twenty gallons of water.

Price per gallon, \$1.00; 5 gallons, \$3.25; 10 gallons, \$6.00; 50 gallons, \$25.00.

SULPHUR—Powdered.

For protection against Mildew on Grapes, Roses, etc.

Per pound, 10c.; 10 pounds, 60c.; 25 pounds and over, 5c. per pound.

TOBACCO DUST.

For Rose Lice, Cabbage and Tulip Leaves. An excellent fertilizer and keeps insects from roots of plants.

Price per 100 pounds, \$2.50.

TOBACCO STEMS FOR FUMIGATING.

Destroys Green and Black Aphis.

Price per 100 pound bale, \$1.50; 400 pounds, \$5.00.

WHALE OIL SOAP.

Destroys Lice on House Plants, Mealy Bugs, Scale on Palms, San José Scale. Rate of four pounds to one gallon of water.

Per pound, 15c.; 5 pounds, 50c.; 10 pounds, 90c.

WEED KILLER.

Effectively destroys roots as well as the top growth, and single application lasts almost an entire season. One gallon to 49 gallons of water.

Per gallon, \$1.00; 5 gallons, \$4.50; 25 gallons, \$20.00; 50 gallons, \$37.00.

FERTILIZERS.

PHOSPHO-PERUVIAN GUANO

THE BEST AND CHEAPEST FERTILIZER IN USE

ADAPTED TO ALL CROPS AND SOIL.
